

Charisma Timber Range

The latest technical advancement in European tile manufacturing allows this new range - using digital ink jet printing which ensures each tile has it's own character.

The look is further enhanced with rectified edges for super fine grout joints.

Made of quality porcelain and finished to require no surface sealing - this is as good as it gets.

No marks or dents that would normally affect natural wood, great for wet areas and suitable for high UV light, it won't fade or shrink.
