

Thunder Range

The Thunder range is a trendy range of large format 450x900mm porcelain tiles. The larger format means there will be fewer grout lines resulting in a more flowing space. The semi-gloss Lappato finish allow for a subtle gloss shine but with a matt texture making this range excellent for interior floor or wall use.

The subtle veining throughout each tile adds textures and tones that replicate natural stone and add a sense of movement

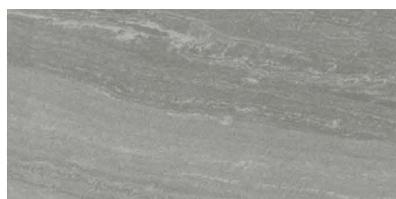

With 4 colours in the range, these tiles will fit into any interior colour scheme.

Thunder Cloud
