

Endura Range

Large format Porcelain Pavers are an ideal and functional feature for your home and garden. These Porcelain Pavers can blend with any landscape - they don't date and will last a lifetime. They can be installed on most substrates, including directly to a prepared sand base course.

Porcelain Pavers will not fade such as other regular pigmented cement pavers and the maintenance of the surface is extremely minimal if any. Tilemax Porcelain Pavers represent the best value for money.
