

Maxstone Cladding

Inspired by New Zealand Landscapes

Maxstone Cladding

Stone is desired for its strength, durable performance, timeless look, value it adds to your new home or renovation. It can be used in any space to add character.

Maxstone Cladding is Real Stone and features lighter weight manufactured pieces making it easy to install, economical and affordable along with a great range of textures and colours to choose.

Maxstone Cladding is engineered to last and normally does not require sealing, painting or coating. It is light in weight compared to other stone and designed to interlock to ensure the stone has a seamless and natural look once installed.

Choose Maxstone Cladding for the qualities and authentic look of traditional stone but with added additional benefits making it more accessible to you.
