

Sahara Range

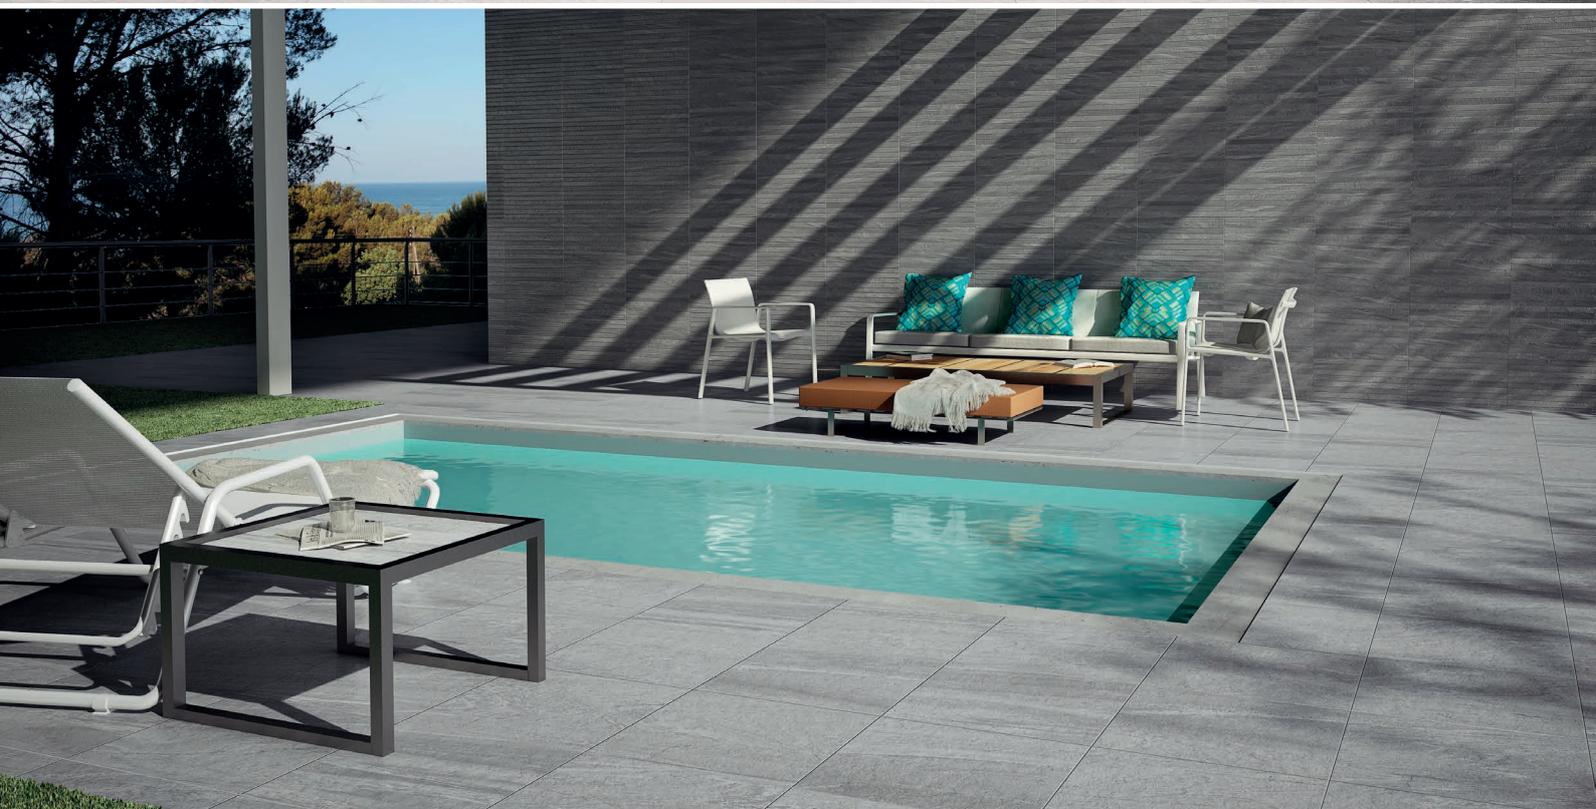

The Sahara collection is inspired by an Alpine quartzite, available in two very natural looking tones (grey and white), and with a particularly attractive design consisting of special and delicate flowing lines that bring to mind the movement of the sands of the desert, from which it takes its name.

This tile can be used on floors and walls. The 600x600mm tile is suitable for all interior areas, and some people may feel comfortable

in utilising this tile outside also. If a higher level of grip is required for exterior use the 450x450mm Antislip tile is built for purpose. This stunning Spanish design has subtle texture, variation from piece to piece giving you a stunning unique final floor or wall surface.

Manufactured in Europe to premium standard.
