To whom it may concern,

Gripset Industries Pty Ltd warrants the adhesion of polymer modified cement-based adhesives that are directly bonded over Gripset wet area membranes. The tile adhesives must comply to Australian Standards AS4992 Ceramic Tile Grout and Adhesive and be fit for application purpose. Additionally, polymer modified cement-based screeds, self-levellers and polymer additives for cementitious systems are also suitable to be used with Gripset's range of waterproofing membranes, all products must be applied as per respective product TDS and be fit for purpose.

Alternatively, Gripset's range of Polymer modified cement based tiling products including screeds, self-levellers and additives can be used to provide a full Gripset system warranty.

Gripset product data sheets and specifications must be read in conjunction with the waterproofing application, and all tiling must be carried out as per AS 3958.1 – 2007 "A Guide to Installation of Ceramic Tiles"

For any information on the above or system specifications contact info@gripset.com
