

IN-OUT TILE RANGE CLEANING & MAINTENANCE GUIDE

The **Tilemax** Range of **In-Out tiles** feature the latest glazed micro grip technology, meaning the surface is smooth to the touch whilst achieving a high degree of slip resistance. This allows the tile to be used in both indoor and outdoor settings – perfect for a seamless indoor/outdoor flow.

With the benefit of the In-Out surface, there is the consideration of added cleaning and maintenance to keep your tiles looking amazing.

Regular Cleaning:

For regular or everyday cleaning, we recommend using Aqua Mix or Lithofin products. Mix Aqua Mix Heavy Duty Tile and Grout Cleaner (available at Tilemax Stores), with the following water/product ratio: 2 parts water : 1 part cleaner. Sugar Soap or an everyday floor cleaner may be suitable as well.

Deep Cleaning:

For a deep clean, we recommend using the Aqua Mix Nano Scrub (available at Tilemax stores), diluted as per the instructions on the container.

Cleaning Tip:

Saturate the tile surface, agitate with brush or cleaning pad, and then mop clean.
